There are so many plant choices in today's market, and I can imagine that all of us at times wonder about the best direction, best plants, and what to do with all the choices. As I think about this, I am reminded about why we started ThinkPlants in the first place, and how one of our main goals was grower-driven to simplify all of this for our market. Our aim was to create a breeding and marketing community with a unified message, a first-class supply chain, and curate a fantastic mix of leading genetics.

This team of professional breeders and suppliers understand the challenges that brokers and growers may encounter, and the goal of ThinkPlants is to simply communicate the common qualities of each of our breeder and supplier participants… best-in-class breeders, highest quality products, consistent order fulfillment, and transparency with a collective desire to meet the needs of the growers and exceed the expectations of the end consumer.

I have had the honor of leading ThinkPlants as all of this has come to fruition, and I know there is always work to be done and growth to be achieved, but I am proud of where we as a team are today. I have had the privilege of being a part of something that seems larger than the sum of its parts and is serving our market's needs in unison with our cooperative ThinkPlants participants.

Thank you for your business, your trust, and for helping us grow,

Joey Wiseman, Director of ThinkPlants

DANZIGER–NUEVA SANTA ROSE, GUATEMALA

DANZIGER

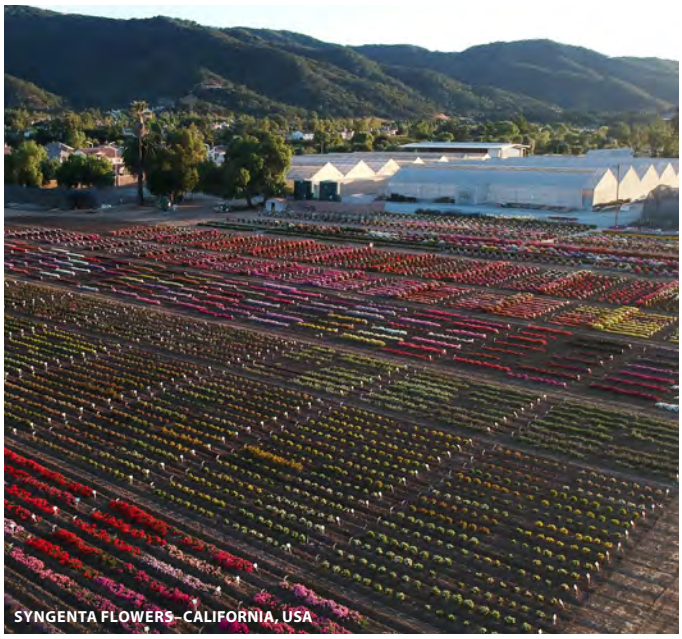

danzigeronline.com

Today Danziger is one of the world's most innovative floriculture companies. Danziger is engaged in the research, breeding, development, production, sale and marketing of cut flowers, annuals and perennials. Not only does Danziger offer top level breeding, they also operate the finest URC supply facility in our industry. Located in Guatemala, this prime position allows for direct and reliable supply into North America. Danziger Guatemala farm is ThinkPlants primary vegetative supplier.

syngenta flowers

syngentaflowers-us.com

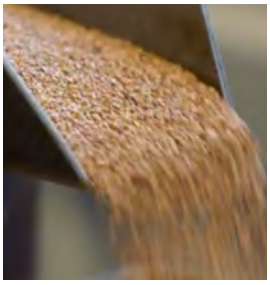

Syngenta Flowers North America is one of the largest wholesale breeders of hybrid flower seeds and cuttings in the world – developing and producing quality flower varieties for professional growers internationally. With a focus on an innovative portfolio and expert technical support, Syngenta's products are known for excellent performance from greenhouse to garden. Distinguished by their exceptional work in early-season perennials and lavenders, they offer a robust assortment of both vegetative and seed-raised perennials for all seasons through ThinkPlants.

SYNGENTA FLOWERS–CALIFORNIA, USA

CREEKSIDE GREENHOUSES–ONTARIO, CANADA

Creekside Greenhouses

creeksidegreenhouses.ca

Creekside is a 3rd generation potted plant grower in Ontario, Canada. With 400,000 square feet of greenhouses and almost 25 acres of outdoor hydrangea production, Creekside specializes in the production of high-quality pre-finished Hydrangea liners. Look for the new BloomChampion® Hydrangea genetics available exclusively from Creekside Greenhouses.

green circle GROWERS

greencirclegrowers.com

Now in the second generation of family ownership, the Green Circle Growers facilities and services have been growing since 1968. Located in Oberlin, OH, Green Circle Growers is a dedicated plug and liner supplier for much of North America. Green Circle Growers is set to produce the majority of ThinkPlants perennials.

GREEN CIRCLE GROWERS–OHIO, USA

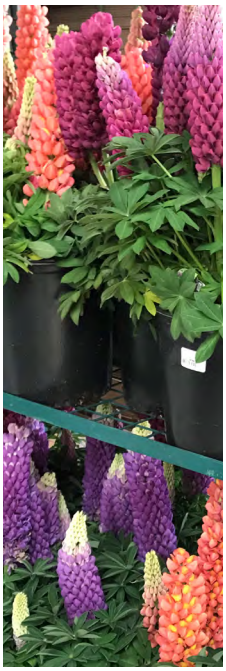

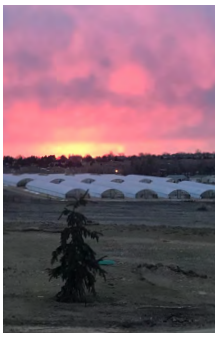

GULLEY GREENHOUSES–COLORADO, USA

GULLEY
Greenhouse & Garden Center

gulleygreenhouse.com

Gulley Greenhouses, based in Fort Collins, CO, is a 45-acre young plant and finished plant facility with both heated greenhouses and cold frame growing conditions, and specializes in the production of perennials, roses, and herbs. Using the great Colorado location, they have also developed a high-quality perennial pre-vernalized liner program for North American growers.

HEADSTART NURSERY–CALIFORNIA, USA

HEADSTART NURSERY INC.
Rooted In Quality.

headstartnursery.com

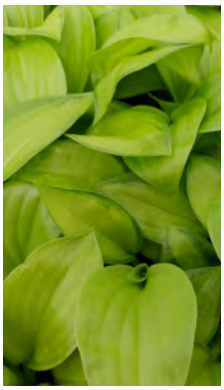

Since 1979, Headstart Nursery has been a West Coast leader in vegetable transplants and ornamental plant liners. They are based in Gilroy, CA and have multiple growing locations throughout California to deliver the highest quality plants possible to the West Coast market.

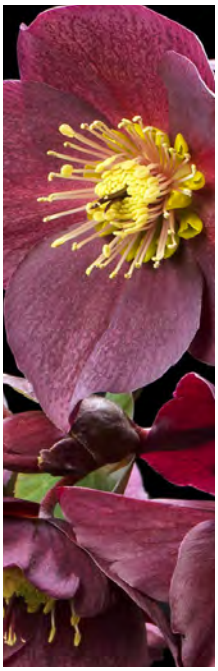

James greenhouses
perennial plugs | specialty propagation

jamesgreenhouses.com

James Greenhouses is a family run company dedicated to producing the highest quality perennial plugs and liners for the North American market. Their location in Colbert, GA, where the winters are mild and there are high light levels, gives James Greenhouses the ability to have year-round high-quality liner production.

JAMES GREENHOUSES–GEORGIA, USA

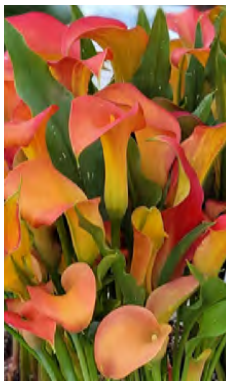

KAPITEYN–ANNA PAULOWNA, NETHERLANDS

Kapiteyn
FLOWER BULBS OUR NATURE

kapiteyn.nl

Kapiteyn is a world leader in breeding and production of high-quality calla lily bulbs. Their advancement in breeding has bundled key characteristics such as compact habit, heavy blooming, and long flower shelf-life into their Captain Calla™ line. In North America, Kapiteyn brings high-quality products to market while offering their expertise and support to growers throughout the production cycle.

KieftSeed™
Perennials from PanAmerican Seed®

kieftseed.com

Kieft Seed, the perennial brand from PanAmerican Seed and Ball Horticultural Company offers a full line-up of unique, high-quality seed perennial genetics that growers count on for reliability and easy programing. These include specialty crops and first year flowering perennials.

Kiwiflora International

kiwiflora.com

Kiwiflora is a plant variety management group, with a combined 30 years of product development and breeder representation, that is based out of New Zealand. They represent a wide variety of plant breeders offering a large selection of new genetic introductions into the North American market.

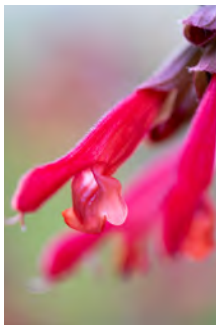

Plants MANAGEMENT AUSTRALIA

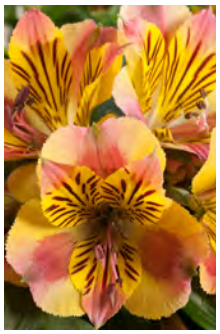

pma.com.au

Plants Management Australia (PMA) represents independent plant breeders from Australia and around the world. PMA has introduced an exceptional array of market-leading innovations over three decades. They are focused on representing the best genetics within a genus that perform in both production and for the consumer.

ROYAL VAN ZANTEN–RIJSENHOUT, NETHERLANDS

Royal Van Zanten

royalvanzanten.com/en/

Royal Van Zanten is an international leader in breeding and propagation of cut flowers, pot plants, and other unique genetics that work well for many North American grower programs. Royal Van Zanten has over 1,000 employees that work from their home base in the Netherlands and in our international breeding and production locations in Uganda, South Africa, and Colombia.

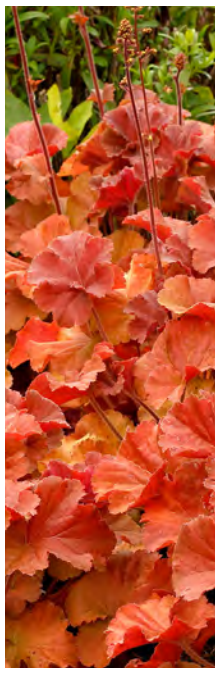

TERRA NOVA NURSERIES, INC.

terranovanurseries.com

During the past 30 years, TERRA NOVA® Nurseries has grown from a small lab and greenhouse to a world leader in perennial and annual plant breeding. The company's breeding team has enriched the horticulture market with more than 1,000 varieties and 30+ national and international award-winning introductions.

TERRA NOVA NURSERIES–OREGON, USA

UNEX–VOORHOUT, NETHERLANDS

UNEX Inc.
UNIVERSAL EXPORT

unexinc.com

Unex Inc. works with top quality producers of bare root perennial products like Astilbe, Hosta, Peony, GAV Lilies, and Hemerocallis. They have a very hands-on approach with Dutch growers and are skilled at storing, packing, and shipping of bare root products to the North American market.

Achillea millefolium Yarrow 1st year flowering

Desert Eve™

Obligate long-day plant allows for spring production and bulking, creating a shorter crop time. Among the earliest flowering Achillea on the market. Desert Eve makes it possible to include rich color in spring and early summer programs.

THINKPLANTS™

ThinkPlants™ is a team of independent and well-established breeding and production companies that have aligned for a common purpose. With each participant in ThinkPlants coordinating its efforts, we are able to share the highest quality products, supplied by the industry's most capable producers. Our items are available in various product forms with the certainty of clean material and accessible availability.

The Danziger Guatemala farm continues to be a leading supplier of perennial URCs to the North American market. This portfolio includes genetics and breeding work from our first partners, Danziger and Syngenta Flowers, as well as our current participants, and other popular open market genetics. Every product in our catalog has been chosen using extensive grower trials and a careful evaluation of its market potential. Our entire offering is supported by an all-star team of the industry's most experienced Technical Service personnel.
