The plant market can indeed be overwhelming with the array of choices available. At ThinkPlants, our goal is to simplify the process for growers by utilizing a grower-driven approach. Our core function revolves around establishing a breeding and marketing community that conveys a unified message, a top-tier supply chain, and a robust selection of superior genetics. Through this strategic approach, we aim to streamline the plant selection process and provide growers access to the finest and most suitable options.

At ThinkPlants, we are committed to continuously improving and always prioritizing the grower's needs in the products selected and the supply chains established for the program. We deeply appreciate the unwavering support from the growers who have placed their trust in the ThinkPlants team and the breeders and genetics we represent. Our dedication remains steadfast in working for the benefit of growers in this industry.

We are growing in the number of professional breeders and suppliers that participate in the ThinkPlants program. Over time we have been able to demonstrate the effectiveness of a collaborative effort in delivering a refined and consolidated marketing approach, a robust trialing program, and an efficient high-quality perennial supply chain. We are constantly working to expand our product offering to provide growers with an even wider range of choices.

Thank you to our participating breeders and suppliers for your continued support and trust in ThinkPlants. And to all the growers who support this program and genetics, we will continue to work hard for you!

Joey Wiseman, Director of ThinkPlants

DANZIGER

Danziger is engaged globally in the research, breeding, development, propagation, production, sale, and marketing of varieties of cut flowers, annuals, and perennials – creating extraordinary flower varieties and beautiful assortments that help customers along the entire value chain achieve extraordinary success.

2018

syngenta *flowers*

Syngenta Flowers North America is one of the largest wholesale breeders of hybrid flower seeds and cuttings in the world – developing and producing quality flower varieties for professional growers internationally. Distinguished by their exceptional early-season perennials and lavenders, they offer a robust assortment of both vegetative and seed-raised perennials for all seasons through ThinkPlants.

Kapiteyn

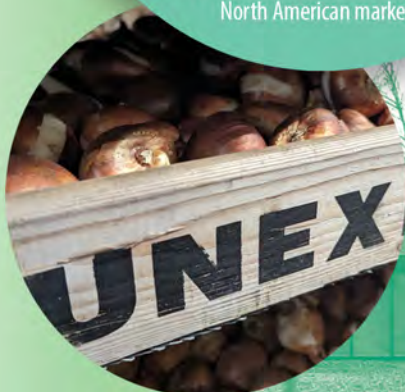

FLOWER BULBS OUR NATURE

Kapiteyn is a world leader in Calla bulb breeding and production. They are the breeders of the Captain Calla line. Their breeding work has developed unique varieties with heavier blooming and a longer shelf life. For the North American market, Kapiteyn brings very high-quality product and hands-on grower support and expertise.

UNEX Inc.

UNIVERSAL EXPORT

UNEX Inc. exports high-quality flower bulbs and perennials, which are grown and cultivated in The Netherlands. As one of the leading Dutch exports, they specialize in high-quality products for the North American, European, and Asian markets. They have a very hands-on approach with Dutch growers plus skilled expertise in storage, packing, and shipping of bare root product for supplying high-quality product to the North American market.

KiwiFlora

KiwiFlora is a plant variety management group, with a combined 30 years of product development and breeder representation, based out of New Zealand. They represent a wide variety of plant breeders and have offered a large selection of new genetic introductions into the North American market.

green circle GROWERS

Green Circle Growers is one of the largest greenhouses in North America with over 150 acres of indoor growing space. Now in the second generation of family ownership, the Green Circle Growers facilities and services have been growing since 1968. They are a dedicated plug and liner supplier for much of North America.

TERRA NOVA NURSERIES, INC.

During the past 25+ years, TERRA NOVA Nurseries has grown from a small lab and greenhouse to a world leader in perennial and annual plant breeding. They are a tissue culture propagator and a grower of both annuals and perennials. The company's breeding team has enriched the horticulture market with more than 1,000 varieties and 30+ national and international award-winning introductions.

2019

James greenhouses

perennial plugs specialty propagation

James Greenhouses is a family-run company dedicated to producing the highest quality perennial plugs and liners for the North American market. They produce and ship more than 10 million liners per year across North America and beyond. Currently, James Greenhouses produces about 650 varieties of perennials, tropical, and specialty annuals.

Creekside is a 3rd generation potted plant grower. With 400,000 square feet of greenhouses and almost 25 acres of outdoor hydrangea production, Creekside specializes in the production of high-quality pre-finished Hydrangea liners, which leave the nursery primed for a quick and high-end finish with the finish grower.

2021

KieftSeed™

Perennials from PanAmerican Seed®

Kieft Seed is a part of PanAmerican Seed, an internationally renowned breeder and producer of seed-raised flowers and vegetables. Kieft Seed is a brand of high-quality seed perennials and specialty crops, including a popular and substantial list of first-year flowering perennials. They offer a great line-up of unique and high-quality seed genetics that growers count on for reliability and easy programming.

Plants 
MANAGEMENT AUSTRALIA

Plants Management Australia (PMA) represents a wide array of breeders and has helped bring to the global market a wide and unique array of plants over the past 25 years. PMA specializes in licensing, marketing, and distribution of new and exceptional genetics.

A 45-acre young plant and finished plant facility with both heated greenhouses and cold frame growing conditions, and specializes in the production of perennials, roses, and herbs. Using the great Colorado location, they have also developed a high-quality perennial pre-vernalized liner program for North American growers.

2022

Royal Van Zanten

Royal Van Zanten is an international leader in breeding and propagation of cut flowers, pot plants, and other unique genetics that work well for many North American grower programs. Royal Van Zanten has over 1200 employees who work from our home base in the Netherlands and in our international breeding and production locations in Uganda, South Africa, and Colombia.

HEADSTART
NURSERY INC.

Since 1979, Headstart Nursery has been a West Coast leader in vegetable transplants, ornamental products, and holiday poinsettias. They have multiple growing locations throughout California and 40+ years of experience and expertise to consistently produce top-quality transplants and plugs that are compact, well-rooted, and ready to grow.

MONROVIA®

Grow Beautifully

Monrovia Nursery has been a pioneer and craftsman in the art of growing plants for nearly 100 years since its founding in 1926. Monrovia has separate nurseries in various regions to deliver plants throughout the country. Monrovia grows more than 4,000 varieties for every landscape need and every region. Monrovia is also well known for many new and unique plant introductions, and a brand that means quality to growers, landscapers, and consumers.

LINWELL GARDENS

Linwell Gardens is a 3rd generation family-run business, with over 16 acres of growing space. Founded in 1989, Linwell is one of Canada's largest propagators of vegetative liners. Linwell Gardens is known for its dedication to the highest quality in liner production and has become one of the largest propagators of vegetative liners in Canada.

2023

deVry
greenhouses Ltd.

DeVry Greenhouses, which third-generation family growers run, is known for its exceptional expertise in growing. DeVry Greenhouses has over 90 acres of greenhouse production and operates out of nine different locations. They specialize in high-quality annuals, perennials, vegetables, herbs, and indoor foliage.

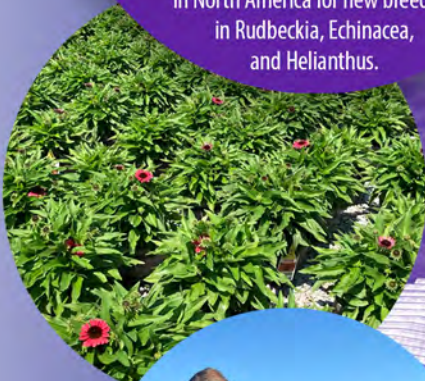

BULL Plant Genetics

Bull Gartenbau has been an integral part of northern Germany since 2009. In Schleswig Holstein, in Gönnebek, Hartwig Bull turned his passion into a breeding profession. Together with his wife Ulrike Bull and a strong team, the horticultural farm manages approx. 11 hectares, 25,000 m² of which are under glass. The "Bull Plant Genetics" plants are not only known in Germany, but also are well known in North America for new breeding in Rudbeckia, Echinacea, and Helianthus.

Kientzler North America

Being part of the European horticultural industry for more than 100 years, Kientzler has a long experience in breeding and developing innovative ornamental plants. The main Kientzler company is located in Gensingen Germany. As part of the Kientzler group, Innovaplant de Costa Rica is a reliable source for high standard unrooted cuttings for worldwide supply. Innovaplant is also involved in elite production, R&D, and laboratory services.

2024

Heuger®

Heuger is a family-owned company dedicated to breeding and production of Helleborus ssp. and hydrangeas. Located in northwest Germany, Heuger is cultivating high-quality young plants, pre-finished and flowering plants for international plant production, and retailers at three locations on 75 acres of outside fields and 70,000 square meters of greenhouse space. Heuger has introduced many new cultivars that set industry trends including the Helleborus Gold Collection® and the Helleborus Ice N' Roses® series.

Achillea millefolium Yarrow

1st year flowering

Desert Eve™

Among the earliest flowering Achillea on the market. Desert Eve makes it possible to include rich color in spring and early summer programs. Obligate long-day plant allows for spring production and bulking, creating a shorter crop time.

Suppliers & Primary Rooting Stations

ThinkPlants perennials can be obtained from most rooting stations that produce perennial plugs and liners. However, you can rely on the following excellent suppliers below to carry ThinkPlants products and provide pricing and availability. Whether you are looking for plugs and liners, URC, seed, tissue culture, or bare root input, we have the supply chain to meet your needs.

If you need assistance
locating product availability,
please email info@thinkplants.com
or reach out to your preferred broker.

ThinkPlants is a team of independent and well-established breeding and production companies that have aligned for a common purpose. With each participant in ThinkPlants coordinating its efforts, we are able to share the highest quality products, supplied by the industry's most capable producers. Our items are available in various product forms with the certainty of clean material and accessible availability.

The Danziger Guatemala farm continues to be a leading supplier of perennial URCs to the North American market. This portfolio includes genetics and breeding work from our first partners, Danziger and Syngenta Flowers, as well as our current participants, and other popular open market genetics. Every product in our catalog has been chosen using extensive grower trials and a careful evaluation of its market potential. Our entire offering is supported by an all-star team of the industry's most experienced Technical Service personnel.
